

## Research Internship or Bachelor / Master Thesis at Bühler AG

Bühler is the global specialist and technology partner for plant, equipment, and services for grain and food processing and for manufacturing advanced materials. Bühler operates in over 140 countries and has a global payroll of 7800.

Our central Research and Development Department is looking for a dynamic contributor, developing fundamental understanding and innovative methods for

### Online sensing of Mycotoxins in Food Processing

Mycotoxins are toxic secondary metabolites of fungi belonging, essentially, to the *Aspergillus*, *Penicillium* and *Fusarium* genera. These naturally occurring chemical compounds can be produced on a wide range of agricultural commodities and under a diverse range of situations worldwide. The accumulation of mycotoxins in foods and feeds represents a major threat to human and animal health.

For this challenging task we are looking for a B.S. / M.S. student from Science or Engineering with first experience in analytical methods and instrumentation. Sound know-how in data analysis is desirable, interest in interdisciplinary research, and enthusiasm about experimental work essential.

The duration of the internship is six months minimum, located in Uzwil, St. Gallen.

Are you interested in tackling this challenge? We look forward to receive your complete online application via our website: [www.buhlergroup.com/career](http://www.buhlergroup.com/career)
